

INNOVATIONS IN STEEL

# Hi-Tech Steel Services

Case Study:  
Yellow Goods

Over the 2-3 years, HTSS has built up a solid reputation in the yellow goods market and supply a number of CAT, Komatsu, JCN and Terex approved subcontractors. HTSS has been successful because it has been very customer focused, providing a 'Just-In-Time', Kanban and Consignment service.

In addition, HTSS has been able set up partnerships with tried and tested mills which offer a Hot Rolled 'laser plate' that is of the highest quality (new and blue, panel flat and side-trimmed). This has given end user consistency of material and continuity of supply.

'I am very impressed with Hi-Tech Steel Services. The company provides a top quality product with a 1st class service' (Production Manager, UK based).
